

# Gróðurhúsið

The greenhouse was opened in January 1993. From 1996 the greenhouse is certified producer of organic vegetables and summer flowers. Organic vegetables are grown according to certain production standards and regulations, that means they are grown without the use of conventional pesticides and artificial fertilizers.

The product mainly consists of tomatoes, cucumbers, peppers and potatoes.

The products can be bought in the greenhouse during the summertime, weekdays from 9-16.
